President Roy L. Trusty (right) receives Accident Prevention Award on behalf of Lago, from Safety Adviser Albino Yarzagaray. The award is from the American Petroleum Institute.

LAGO EARNS THREE SAFETY AWARDS FROM AMERICAN PETROLEUM INSTITUTE

Recently Lago's Safety Adviser Albino Yarzagaray presented an Accident Prevention Award to President R.L. Trusty which the company received from the American Petroleum Institute. API issues these safety awards to member refineries which achieve 1,000,000 manhours or more of operation without a disabling injury. Lago's award in this case was for the period of October 14, 1970, to July 6, 1971, with over 2.1 million manhours. Accepting the award on behalf of Lago, President Trusty commended employees for their continued safety efforts, especially in a period of major construction and turnaround in the refinery.

Recently Lago was awarded two similar API safety awards, for 1969 and 1970.

THIRD PRE-EMPLOYMENT PREPARATORY PROGRAM TO START IN JANUARY

Technical school students interested in the six-month training under the Pre-Employment Preparatory Program offered by Lago should apply at the Training Section of the PR/IR Department by December 10. First preference will be given to UTS graduates, but consideration may also be given to a few outstanding MULO-B graduates. Applicants must be between 18 and 25 years of age. All trainees will be selected on the basis of test results, school grades and personal interviews. Students should call 9-2527 or apply in person to Room 244, Administration Building for an enrollment form.

KEROSENE HYDROFINER ON STREAM

The Kerosene Hydrofiner (KHAR) was started up on November 1. The unit was brought up for capacity tests and also quality tests for the production of stove oil. Feed rate is presently 48,000 barrels a day. The design rate is 40,000 barrels a day.
